DynamicsPrint

The following Product Terms apply to the Solution DynamicsPrint.

Description of the Solution

DynamicsPrint is a Microsoft preferred solution. It is a complete ERP solution for the printing industry compatible with Microsoft 365 FO. DynamicsPrint can handle every aspect of your company's operations – from quoting and production to resource planning and finance. Microsoft is promoting the solution on AppSource

User role definitions

The user role definitions for the Solution are the following:

User role	Description of access
Operations:	Access to all the Solution's modules.
Activity:	Access to limited modules of the Solution, except for basic settings such as parameters, work center tables, price definitions etc.
Team:	Grants access to the shop floor control module for reporting time and materials.

Any user who will be granted as 'system administrator' will automatically be assigned to an 'operations' user.

Technical requirements

Customer must comply with the following technical requirements to use the Solution:

- For each license to the Solution, Customer must have a valid subscription to Microsoft Dynamics 365 Finance & Operations during the term of the Agreement;
- Microsoft Dynamics 365 Finance & Operations must be implemented at Customer; and
- Customer must grant DynamicsPrint technical access to monitor Customer's number of users on an ongoing basis.

Data

DynamicsPrint must have access to all relevant data from Microsoft Dynamics 365 Finance & Operations.
